PROFILE

Aspiring web developer with a proven ability to adapt in collaborative environments while focusing on achieving high-quality results. I am enthusiastic about clean code and deploying projects in an organised and efficient manner. I genuinely love learning,the journey never stops! Bellow you will find projects I've completed that showcase my skills.

PROJECTS

BEE KIND DONATION APP

BeeKind allows users to donate easily to various charities across the US and UK. Every.org Charity API is being used for all charity data to be fetched. Powered by the Stripe API,each user is able to enter their debit/credit card details in order to donate to their selected charity. Email subscription is offered as an option.

Technologies: React, MongoDB,Express,Node.js, React Hook Form

WEATHER APP

Weather App allows the user to get informed of the temperature, humidity and wind speed of the city they search. It utalizes the OpenWeatherMap and Unsplash APIs. Providing a better experience,the background changes depending on the city.

Technologies: JavaScript, HTML, CSS
